

Single Bay

Coin-Op
Unit

MAGIKIST

- Complete system for a single bay coin-operated pressure wash.
- Compact and sturdy powder coated floor stand minimizes space requirements.
- Triplex ceramic plunger pumps belt driven at slow speeds for quiet operation and extended life.
- Panel mounted stainless steel solenoid valves with brass metering valves for soap and optional wax .
- High security BlockLock stainless steel coin meter is supplied with rotary selector switch, electronic coin acceptor and decals.
- Stainless steel coin meter is available in surface mount, recessed rear access, recessed front access, or vault ready styles.
- iCoin electronic multi-coin coin acceptor accepts any or all of quarters, loonies, toonies, and up to three tokens of your choice.
- Control panel houses electronic timer, transformer and contactor in windowed fiberglass enclosure.
- Electronic timer can accumulate over nine hours of time with no limit to the number of coins that can be accumulated. Digital display on timer provides coin count and hour meter functions. Timer supports last minute alert and one coin restart features.
- Premium quality 360° overhead boom permits free and easy swivel rotation around vehicle. Heavy gauge steel construction with double ball bearings and twin compression springs.
- Soap container allows for mounting of Magikminder soap proportioner for easy and consistent soap dilution and supply.
- Easy-pull trigger gun comes with high pressure swivel, 24" insulated wand, stainless steel nozzle, and drop hose from overhead boom.
